

## **Warning**

Keep this sheet for your records

This swivel is designed for MAPP-GAS.

As such, the static o-rings inside the swivel are supplied in a Viton compound.

If a seal kit is ever installed in the swivel, it is important that the company supplying the seal kit is advised the service is MAPP-GAS. The standard seal kit supplied for propane service is not recommended.

The above seal kit is a special order item and is not stocked by our distributors. Therefore, do not use an off the shelf seal kit as leakage may result.

Contact Full-Circle if you have questions at 805-498-2589
